- jQuery

PROJECTS

Password Generator

Password generator allows you to generate a password between 8-128 characters. The generated characters can be symbols, numbers as well as uppercase and lowercase letters. The type and number of characters contained is based on the information obtained by the requestor.

Language/Technology Used
- HTML5
- CSS
- JavaScript

Workday Scheduler

This workday scheduler gives the user a 9-hour scheduling organizer. It starts at 9AM and ends at 5PM. This scheduler allows the user to input a description, for each time block, of the task needed to be executed that day. The user can also save the task (clicking the blue button) in the local storage therefore if that page is closed or refreshed, the task will be stored and displayed for the user.

Language/Technology Used
- HTML5
- CSS
- JavaScript
- Bootstrap
- Font Awesome
- jQuery

Weather Dashboard

The Weather Dashboard gives the user access to search for any city and obtain the temperature, humidity, wind speed and UV index in real time. The Weather Dashboard also displays the next 5 forecast days. This application also stores the users searched cities on the left column, with the most recent searched city on top.

Language/Technology Used
- HTML5
- CSS
- JavaScript
- jQuery
- Bootstrap
- Font Awesome
